DESIGNER

Carlo Basso

Carlo Basso was born in Italy; his products' design has been appearing worldwide for more than 20 years, the purpose of his design architecture is to shelter and enhance comfort with style and to believe in the nobility of his passion.
To understand more about Basso's outdoor furniture, and where it comes from, we need to look at the innovative and inspirational designers that carved the pathway.
Learn how they all participated in creating such a phenomenal charge in your backyard living.
Get a well-rounded view of how these classic contemporary designs can give a distinctive accent to your spaces without changing the balance.
Basso, whose line of outdoor furniture combines retro and vintage with a modern twist, added that distribution through mid-end and high-end retailers and direct customers.

INTERNATIONAL SOCIETY OF FURNITURE DESIGNERS

Maurizio Priolo

Graduated in 2007 with a Degree in Architecture and Interior Design from the Valle Giulia Faculty of Architecture, Sapienza – University of Rome. Continuing his Architecture studies, in 2013 he graduated with a Master's Degree in Architecture and became a certified professional Architect.
Since 2008 he has been responsible for artistic direction, planning and production of national level trade show events and stands; concept development and commercial space design and fitting. He provides a public and private exteriors consultation and design service for a specialist manufacturer of outdoor products.
Since 2016, he has been collaborating with an international outdoor furniture manufacturer, managing prototyping and manufacturing of certain collection pieces.
He won second place with Francesca Pitisci in the Spreach Agorà Design 2018 design contest with the Fillo Sun Flow project.

Francesca Pitisci

Graduated in 2008 with a Degree in Architecture and Interior Design from the Valle Giulia Faculty of Architecture, Sapienza – University of Rome. Continuing her Architecture studies,in 2013 she graduated with a Master's Degree in Architecture and became a certified professional Architect.
In 2015, she gained further insight into sustainability issues studied at undergraduate level and took a LUMSA Master's Degree in CasaClima ® Sustainable Architecture.
She then joined the executive management of Fondazione Italiana Bioarchitettura (Italian Sustainable Architecture Foundation).
Since 2016, she has been collaborating with an international outdoor furniture manufacturer, managing prototyping and manufacturing of certain collection pieces.
She collaborates with the ULA Architects Design Group, based in Rome.
She won second place with Maurizio Priolo in the Spreach Agorà Design 2018 design contest with the Fillo Sun Flow project.

Abie Abdillah

Abie Abdillah is an emerging Asian design talent. Trained as industrial design student from the college years, and strengthened from his experience as junior designer in a furniture manufacturer and design studio based in Jakarta.
Having a keen passion to work with local materials such as rattan and teak wood, Abie has gained recognition of his works thanks to numerous awards and publications. He is now starting his own studio called “studiohiji”, which is based in Tangerang, Jakarta.
The creation of Yoko sofa set started from a Designer Dispatch Service programme, which was initiated by the Ministry of Trade of the Republic of Indonesia and the Japan International Cooperation Agency. The project was meant to increase the value of local manufacture through design.
By working with one of the most versatile manufacturers, Yoko sofa set was created to expose the essence of the materials being used. Either it was a combination of powder coated aluminium steel with rattan cores for indoor purpose, or with synthetic rods for outdoor.

Sugeng Untung

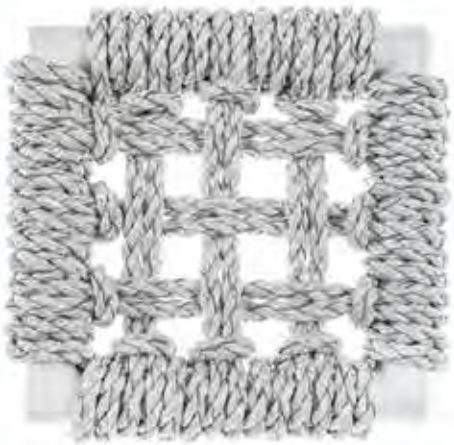
An interior designer who has developed and been actively involved in some interior developing projects such as I Gusti Ngurah Rai International Airport in Bali, Indonesia and some other interior projects.
Sugeng expands his expertise not only in interior design but also product design in which he has been interested specifically for furniture for the last three years.
In addition, Sugeng shows his passion on developing furniture design by joining several design competition and has gained more than ten achievements.
Sugeng, who loves design and art, is endlessly making efforts to continuously explore any value of life in order to create more valuable and beneficial aspects for others.

Stefania Battiston

Graduated from the Faculty of Architecture in Venice, has developed her own experiences as a product designer and art director, acting as an interpreter of contemporary style trends.
In 2006, Stefania founded STEP, a dynamic and multifaceted industrial photography workshop, to make available to companies the solid knowledge she acquired and consolidated in the field of photography, styling and design.

Oriol Llahona

Oriol Llahona (Barcelona, 1977) studied Design in Elisava (Barcelona),
at the Universität GH Essen (Germany) and at the Southampton University (UK).
After working in companies and design studios, in 2006 he created the brand “llahona.”, based on designs with a cosmopolitan, contemporary and positive vision.
You can find in his designs the essence of life and the emotions, shown with elegancy and a hint of surprise.
Currently he is working for companies in Europe, Asia and America.

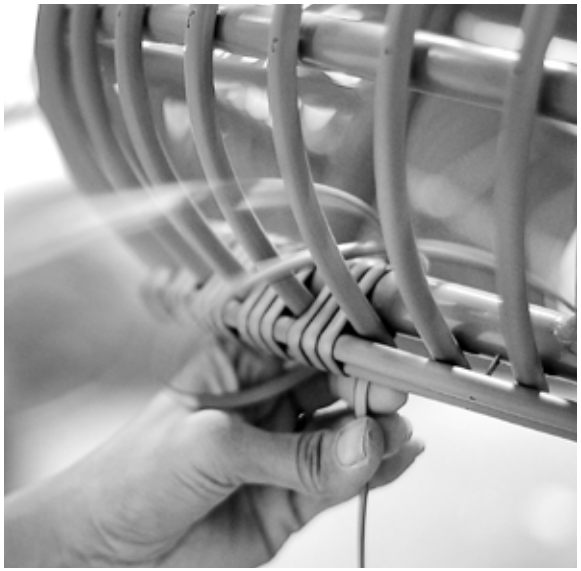


STRUCTURE

Structural component and aesthetic value

Lightness and strength are the most important characteristics of the aluminum used in the collections of cbdesign. The malleability of this material makes it easy to work with and allows more space for creativity, making it possible to create new and authentic shapes for an impressive design. In the cbdesign collections, aluminum is an integral part of the design altogether with either the synthetic spoke profile or the weaves.

ALUMINIUM



An integral part of the design

In 2011, cbdesign introduced epoxy powder finished aluminum frames which, combined with the synthetic spoke profile, reproduce the voluminous and natural wicker style of the garden furniture from the seventies: the retro-style collections with exposed frames are the distinctive signature of cbdesign. Over time, the techniques evolve towards profiles that stay prominent but are more subtle, that keep their strength unaltered but create modern and essential lines.
In addition to the spoke profile, the aluminum is combined with weaves which, depending on the process, create detailed textures and decorative motifs

High resistance and greater customization

The aluminum used by cbdesign is finished with epoxy powder, a very important treatment for aesthetic qualities but also for functionality, as it protects the metal itself from atmospheric agents, chlorine and salt water, ensuring the collections a long-lasting lifetime.
One of the strengths of cbdesign is customization, which lets customers choose and combine the colors for each individual component to create customized products: the 12 frame hues can be combined with the 12 synthetic fiber tints and the 12 shades of wrapping to create over 1700 color combinations.

NATURA TEXTURE

Special handmade process

The aluminum can be enhanced with an exclusive cbdesign process called Manao Texture: a complex process divided into several phases where our artisans paint details on the aluminum frames entirely by hand, reproducing the knots, veins and shades of natural rattan to create unique pieces that maintain their beauty unchanged over time.

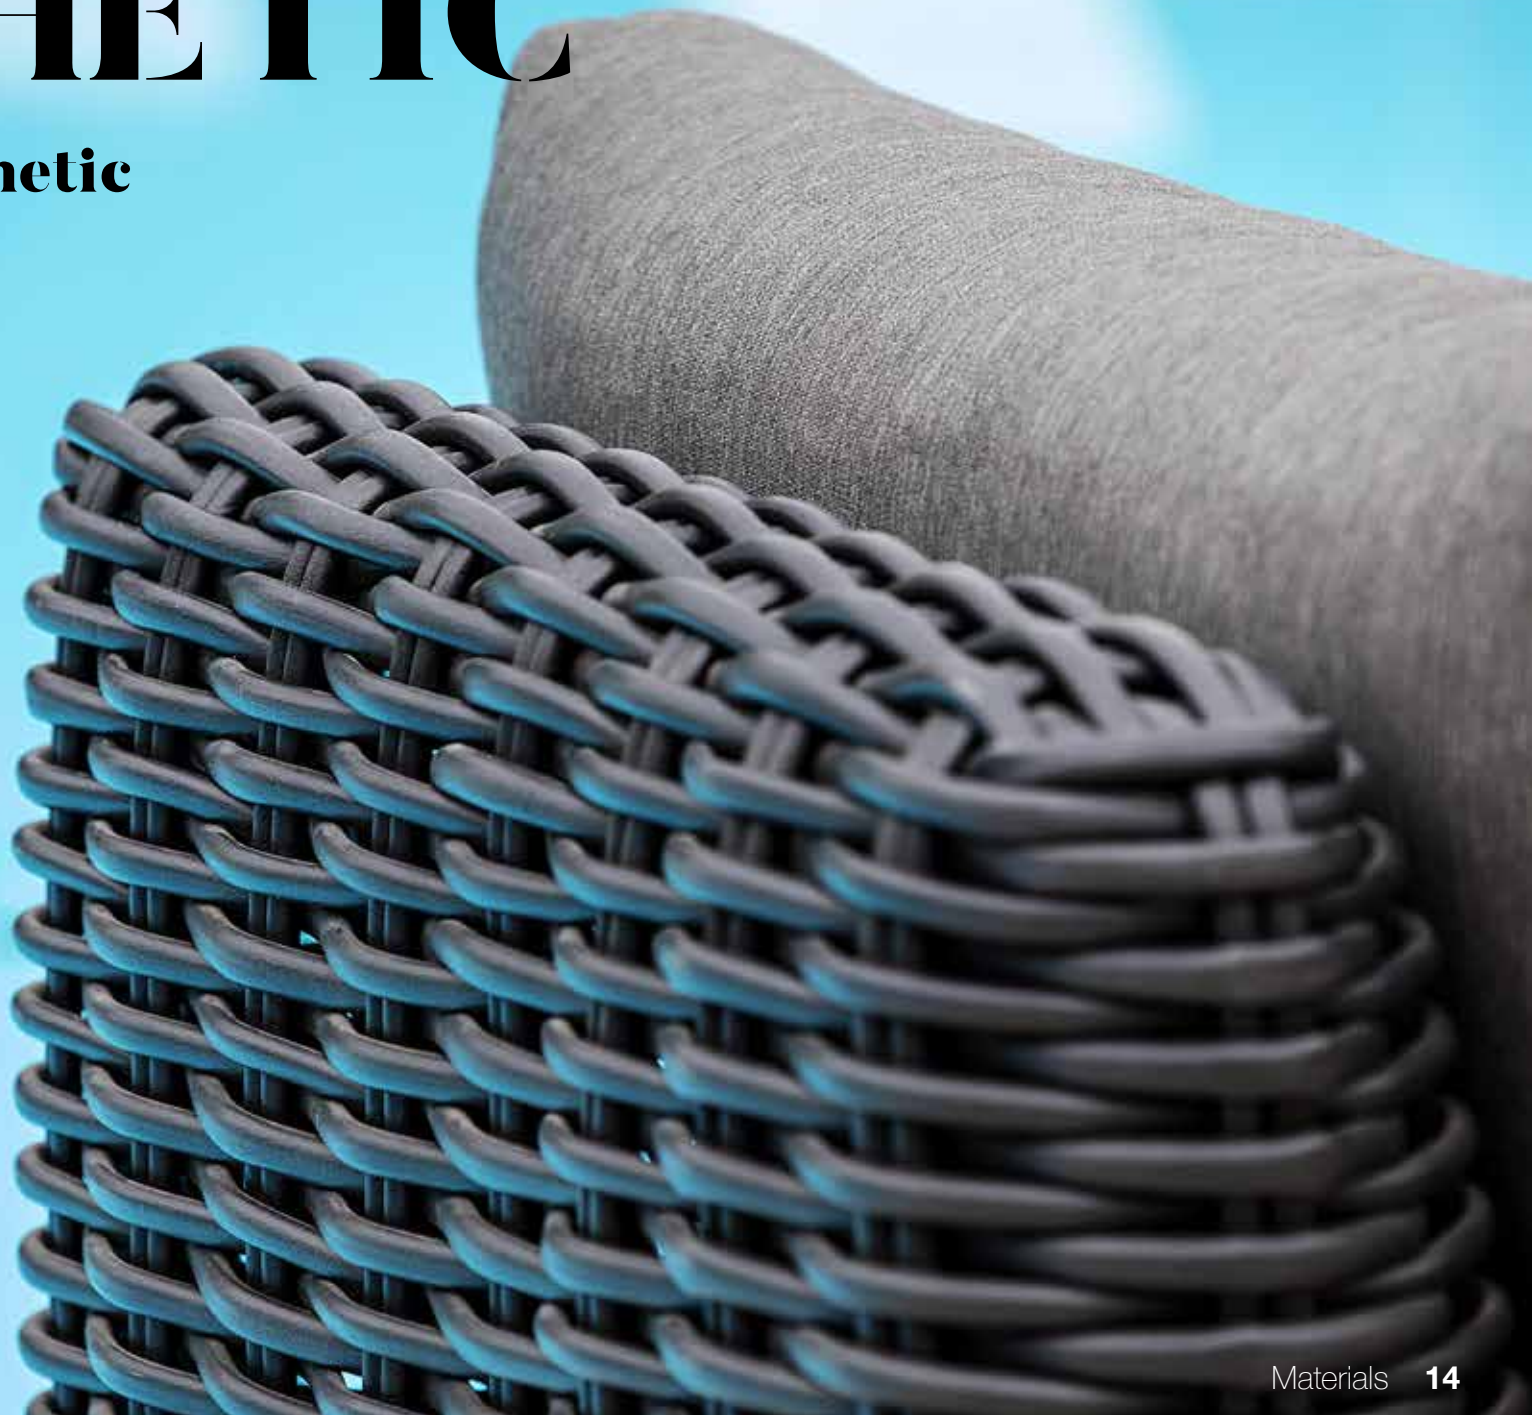
SYNTHETIC

Pioneers of the synthetic spoke profile

Cbdesign is one of the first outdoor furniture companies in the world to create an innovative form of synthetic that is still recognized from their products: the spoke profile.
Born in 2011, this new synthetic profile becomes the starting point to reproduce the traditional natural cane furniture of the seventies: the 10mm thick spokes are curved, closed together and fixed with clamps to the powder finished aluminum frame. The results are collections with a retro flavor where the aluminum reminds of the bulkier cane and the synthetic of the thinner reeds.
This technique has evolved over time, giving shape to modern and stylized collections: the profiles become uniform and thin, the composition of the elements becomes less conventional, the colors brighten up and multiply.



High quality, great resistance and sustainability

The synthetic is produced and worked by hand directly by cbdesign factories, to enhance the quality and refinement of the collections. Its main feature is the strong temperature resistance, ranging from -70°C to 80°C, ideal to create furnishing elements that must withstand extreme weather conditions. In addition, it is resistant to water corrosion from both seawater and pool water.
Cbdesign offers maximum customization to best meet the needs of its customers: the 12 frame hues can be combined with the 12 synthetic fiber tints and the 12 shades of wrapping to create over 1700 color combinations.
Furthermore, cbdesign is very cautious on protecting the environment: the synthetic is eco-friendly, and its high quality allows it to remain stable and compact, without melting or wearing out over time.

Weaving for traditional and modern weaves

In 2016 cbdesign revolutionizes the synthetic weave: the Bubble collection is born, with a cane weft of variable thickness (11-14mm) which faithfully reproduces the irregularities and shades of natural reed. The weave is no longer flat but three-dimensional, aimed at creating collections with generous proportions.

Today, in line with the trends of outdoor design, cbdesign has developed a synthetic that simulates rope in composition and texture: the weave is anchored with a network of knots to the aluminum structure, evoking the elaborate tying of the cordage from sailing ships.

The intertwined workings of cbdesign are made exclusively by hand from expert craftsmen with care and attention, enhance the handmade character of the creations and become even more refined thanks to the countless combinations of colors that can create detailed textures and decorative motifs.

WOOD

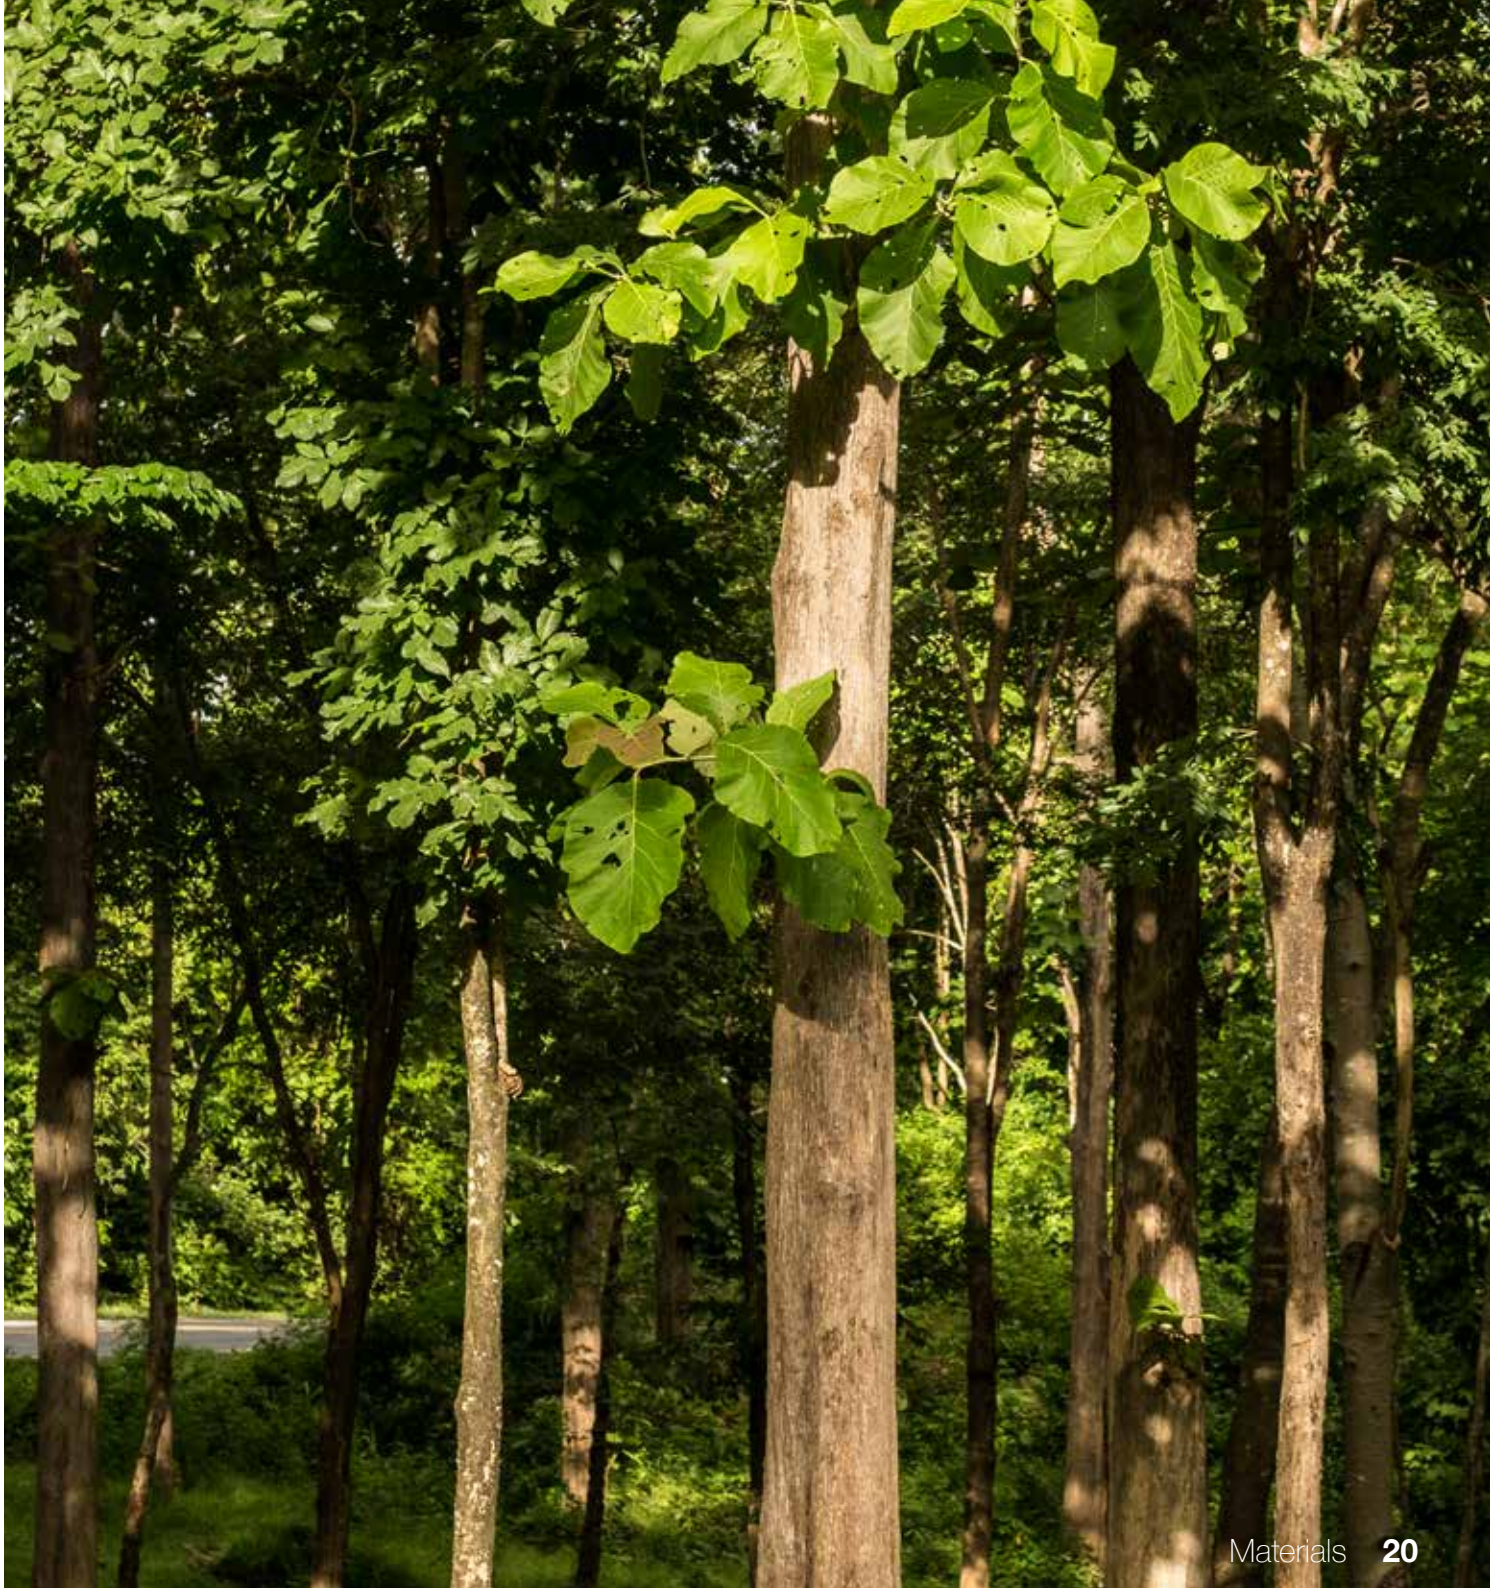
Indonesian Legal Wood Certified

Cbdesign uses Indonesian Legal Wood and FLEGT certified teak and exclusively of grade A, the highest quality available on the market. The wood comes from trees grown at least for 40 years in Indonesian plantations that are controlled, sustainable and rigorously managed with respect towards nature and its integrity for future generations. A very important aspect that demonstrates the environmental sensitivity of cbdesign and the responsible origin of the material.

In harmony with nature

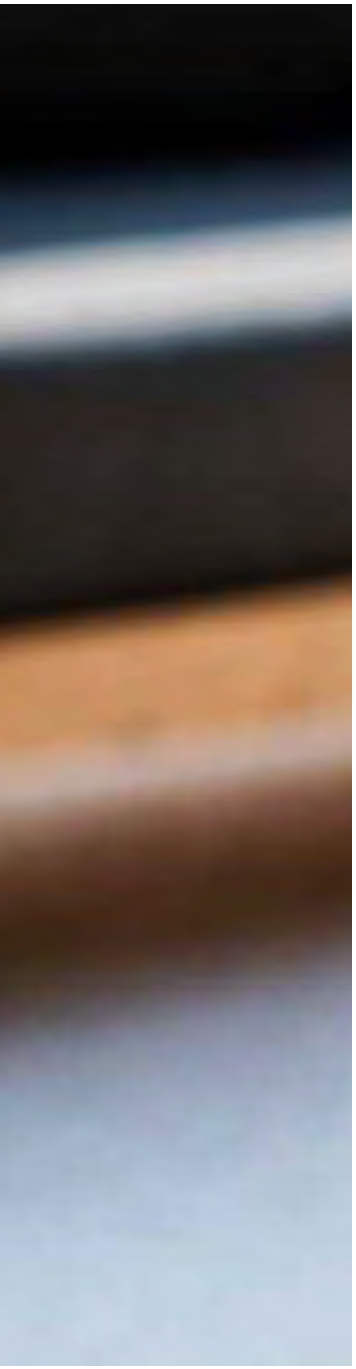
The high quality of the teak used by cbdesign guarantees the products considerable resistance to atmospheric agents, salt water and chlorine. The collections can be made entirely in teak or in combination with synthetic: they are perfect for embellishing outdoor spaces with originality and design, creating a deep and lasting harmony between nature and furniture.

Indonesian LEGAL Wood



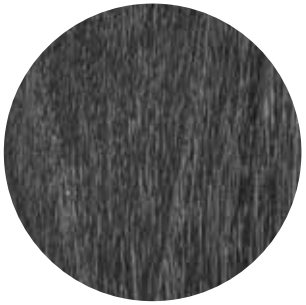
A living and precious material

The teak wood of the cbdesign collections is characterized by a distinctive honey tone and smoothness to the touch. As it is a living material, it tends over time to take on a silvery tone given by the natural oxidation of the wood, which gives the surfaces a pleasant lived-in appearance, very trendy in the world of outdoor design. It is possible to bring back its initial golden color by using specific products that revive its natural shades and transmits a greater sense of warmth.



Natural

New Grey



Charcoal

Smoke White

White Wash

ROPE

A synthetic material for natural effects

Cbdesign uses SUNPROOF rope on their furnishings and accessories. Made of synthetic material, it is very suitable for the outdoors because it does not absorb moisture and dries quickly. The color has an excellent durability, the fiber is resistant to stains, molds, abrasions and sunlight and moreover it is highly ecological and recyclable.

The rope has a thin thickness of 5 mm and allows for solid weaves in substance and softness to the touch, ideal for furnishing projects where comfort and durability go hand in hand.

CUSHION

Our cushions are designed to last over time. Their non-deformable foam core is covered with removable, water-repellent and stain-resistant OLEFIN fabric, available in a very wide range of colors that are resilient to harsh weather conditions.

ARMONY

SERIES

Armony

Armony is a collection of comfortable seats, where the weaves and materials create perfect harmony, as the name suggests. The sofa and lounge chair in aluminum and synthetic are supported by cross legs in teak, while the chair is available with legs in aluminum or teak. Chairs, armchairs and sofas with a delicate and elegant character furnish every outdoor space both as unique pieces and as a whole.

MALAGA

SERIES

Malaga

Malaga is a collection of enveloping chairs and large sofas with a strong imprint: let yourself be captivated by the intriguing game of weaves that embellish the seats. It is perfect for giving a touch of personality to the outdoor environment, where you can spend relaxing moments with a book in your hands or in pleasant company while sipping a cool cocktail.

FLORENCE SERIES

Florence

Get comfortable and relax in the retro style and colonial atmosphere of Florence: a unique collection of armchairs and sofas, in which the veins, knots and shades, typical of the naturalness of rattan, are reproduced by hand by artisan artists on the structure in aluminum. The soft padded cushions are ready to cuddle and envelop you whenever you want, to instill a feeling of absolute peace in body and mind.

NUSA

SERIES

Nusa

Comfortable chairs, cozy lounge armchairs and sofas with a slim and elegant silhouette are the protagonists of the Nusa collection. The design is inspired by the retro shapes of rattan furniture and reinterprets them with modernity, by combining the aluminum structure with synthetic fiber weaves. The meeting points between the materials are highlighted by color contrasts to give a touch of originality to relaxation.

MANHATTAN SERIES

Manhattan

By Carlo Basso

Enveloping and refined in its rounded shapes, Manhattan by designer Carlo Basso is the collection of armchairs and sofas ideal for all moments to spend in peace, alone, as a couple or with friends. The solid aluminum and synthetic structure can be combined with tone-on-tone cushions for a coordinated style or colored for an effective look.
